## New Features and Improvements

### Components

- **WSID-7: Update the search procedure so it will read documents in blocks**
  - Release Note: Allowed document block documents to be searched

### SAMpeople

- **WSID-414: Update SAM People to use new vacancy details link**
  - Release Note: Updated the SAMPeople list to allow a vacancy URL to be output, and updated the default template to use it

### Other

- **WSID-161: Juniper Parent App share settings**
  - Release Note: Updated Juniper Connect integration so that an API key can be added to the website, allowing newsletter and calendar categories to be selected for sharing with the Parent App

## Bugs Fixed

### Components

- **WSID-443: Error when duplicating document blocks**
  - Release Note: Fixed an error that could occur when duplicating document blocks

### Other

- **WSID-242: JW – Compliance with Google's EU user consent policy – multiple websites**
  - Release Note: Added a record of cookie consent for current visitors
